Senior Frontend Engineer

Frontend Engineer with **4+ years of professional experience** building reliable, high-performance web applications in startup and growth-stage environments. Strong expertise in **React, TypeScript, and modern frontend architecture**, with hands-on experience delivering **financial, dashboard-heavy, and transaction-driven products**.
Known for translating complex business and regulatory requirements into clean, accessible, and maintainable user interfaces. Comfortable working cross-functionally with product, design, backend, and operations teams. Passionate about performance, secure frontend practices, and using modern tooling (including AI-assisted workflows) to ship quality software efficiently.

WORK EXPERIENCE

TheHoracle Studios — 01/2021 - Present

Branding and business strategy agency

Web Developer & Designer

- Delivered **production-grade web applications** for eCommerce, SaaS, fintech-adjacent, and non-profit organizations using **React, Next.js, TypeScript, and Node.js**.
- Built and maintained **secure payment and transaction-related flows**, ensuring reliable client-side validation, error handling, and seamless user experience.
- Collaborated directly with stakeholders to translate business requirements into intuitive, scalable interfaces very often taking products from **MVP to production**.
- Optimized frontend performance and SEO, resulting in improved discoverability, faster load times, and higher Lighthouse scores.
- Deployed and maintained applications on **Vercel, AWS, and Cloudflare**, contributing to a **95% reduction in downtime** through improved hosting and deployment strategies.
- Managed projects end-to-end: requirements gathering, UI/UX implementation, deployment, and client handoff, consistently improving delivery timelines and client satisfaction.

Bibuain UML — 01/2025 - 04/2026

Frontend Engineer

- Engineered a **responsive, high-performance B2C dashboard** featuring staff management, transaction views, and operational tooling.
- Translated complex business requirements into scalable UI components, improving usability and reducing operational bottlenecks.
- Improved customer-facing application usability, contributing to a **70% increase in user satisfaction** through responsive design and iterative, data-informed enhancements.
- Worked closely with backend engineers and product stakeholders to ensure frontend features aligned with business rules, performance expectations, and operational needs.
- Debugged and resolved UI issues across devices and screen sizes, maintaining a consistent and reliable experience.

Web Edge Development — 05/2023 - 01/2025

Frontend Developer

- Designed and implemented responsive web interfaces using **React, Next.js, and modern CSS frameworks**.
- Partnered with designers and backend engineers to deliver polished, cross-browser-compatible applications.

- Improved performance and accessibility, contributing to faster load times and stronger Lighthouse performance metrics.
- Participated in **code reviews, technical planning, and CI/CD workflows**, helping maintain clean, maintainable, and consistent codebases.

MirrorMedia **07/2019 - 12/2020**
Graphics designer

- Designed branding, print, and digital assets for multiple clients.
- Developed a strong foundation in visual design, layout, and user-centered aesthetics and skills now applied to frontend UI development.
